

ASK YOUR DOCTOR IF WEIGHT LOSS SURGERY IS RIGHT FOR YOU.

BODY MASS INDEX (BMI)

BMI measures obesity based on weight and height. This determines if you are qualified for weight-loss surgery.

IS YOUR BMI 35 OR MORE?

If your BMI is between 35–40, you qualify for weight-loss surgery with two or more medical conditions such as Diabetes, High Blood Pressure, High Cholesterol, GERD, Heart Disease or Sleep Apnea.

If your BMI is 40 or over, you qualify for weight-loss surgery without any other medical conditions.

BMI CHART

Weight	4'9"	4'11"	5'1"	5'3"	5'5"	5'7"	5'9"	5'11"	6'1"	6'3"
154	33	31	29	27	26	24	23	22	20	19
165	36	33	31	29	28	26	24	23	22	21
176	38	36	33	31	29	28	26	25	23	22
187	40	38	35	33	31	29	28	26	25	24
198	43	40	37	35	33	31	29	28	26	25
209	45	42	40	37	35	33	31	29	28	26
220	48	44	42	39	37	35	33	31	29	28
231	50	47	44	41	39	36	34	32	31	29
243	52	49	46	43	40	38	36	34	32	30
254	55	51	48	45	42	40	38	35	34	32
265	57	53	50	47	44	42	39	37	35	33
276	59	56	52	49	46	43	41	39	37	35
287	62	58	54	51	48	45	42	40	38	36
298	64	60	56	53	50	47	44	42	39	37
309	67	62	58	55	51	48	46	43	41	39
320	69	64	60	57	53	50	47	45	42	40

Morbidly Obese

BMI (kg/m²)= ≥40

Severely Obese

BMI (kg/m²)=35-39.9

Obese

BMI (kg/m²)=30-34.9

Overweight

BMI (kg/m²)=25-29.9

Healthy Weight

BMI (kg/m²)=18.5-24.9
